

Circletalk

For Providers & Allied Health Professionals

Fast-Track Intake & Strengthen Participant Voice. If your team is spending valuable time gathering background info across referrals, assessments, or transitions—Circletalk can help.

What is Circletalk?

Circletalk is a secure, participant-led app that enables people with disabilities, neurodiverse conditions, or complex support needs to share accurate, strengths-based information in real time with their Circle of Support—including **therapists, support coordinators, and educators.**

It's designed to **save time and resources** for both **funded and unfunded supports**, making your role more efficient and participant-focused.

Why Allied Health & Support Teams Recommend Circletalk

- ✓ Fast-track intake with less repetition
- ✓ Access more accurate information from the participant's own perspective
- ✓ Reduce double-handling across providers
- ✓ Save time in case noting, reporting, and planning
- ✓ Share consistent updates across therapy, education, and community settings
- ✓ Align with families more easily before planning or review meetings

Easy to Use. Designed for Privacy.

- No reports or diagnosis required
- Uses name or how the participant identifies, and year of birth only
- View-only access ensures participant safety and trust for free
- Works alongside your existing systems—not a replacement

What Information Can Be Shared?

- Strengths and support preferences
- Communication and sensory needs
- Short and long-term goals
- Online/offline tools used by the participant
- Transitions, routines, and planning considerations
- Information is always controlled by the participant or their carer.

Recommend Circletalk Today

This service is available through the **NDIS** under Low-Cost Assistive Technology, or as a self-funded, fee-for-service option. It comes with a **one-off annual fee of \$390 AUD.** Participants can **unsubscribe and rejoin at any time**, making it a flexible option that adapts to their changing
